## Full Synthetic NEA Gear Lubricants

Formulated using synthetic base stocks and proprietary additive system to provide excellent fluidity at lower temperatures assuring faster lubrication of components and easier shifting of transmission..

### PERFORMANCE:

These lubricants meet or exceed following industry specifications:

- API GL-5, API MT-1
- Dana Heavy Duty Eaton Axle PS-163
- SAE J2360
- Mack GO-J
- MIL-PRF-2105E

### APPLICATIONS INCLUDE:

- Recommended for year around use in wide range of automotive manual transmissions, differentials, steering, gears, rear axles, and transfer cases

### Typical Properties

SAE Grade	75W-90	80W-140
Gravity, °API	25.0	23.6
Viscosity, cSt @ 100° C	15.9	26.0
Viscosity Index	160	150
Pour Point, °C	-48	-30
